

Internet access from smartphones and tablet devices has greatly improved the work environment of long-distance truck drivers. Using your favorite search engine, identify at least three apps that a trucker might use to do two or more of the following: obtain routing information, manage fuel consumption, find truck stops or truck-friendly rest areas, record what they have hauled and where they have hauled it, track required permits, locate Department of Transportation weigh stations, maintain electronic log books, or find potential loads and place bids to carry them. For each app you identify, write a paragraph that explains what the app does, how much it costs, and on what type of devices it runs.

Answer: I have found these three apps that might help truck drivers.

Trucker path:

Trucker path is very popular, and it is very popular on app stores. It provides valuable information related to truck stops, parking availability, fuel prices, and weigh stations. Truck drivers can access real time data from this app. It gives access to the driver for real time data for available parking spots, weigh station statuses, truck wash locations, and roads with low clearance. It is a free app anyone can download from the app store.

KeepTruckin:

KeepTruckin is an all-in-one solution for truckers. It offers electronic logging, GPS tracking, maintain electronic logbooks and vehicle diagnostics. Drivers can log hours of service track fuel consumption and receive real-time alerts. It is free to download and available in iOS and google play store.

Truckstop go:

Truckstop go is one of the most popular truck driver's helpful applications. It has all the load sharing, live loads, and daily rate information. It shows the rest area, permits and electronic logs. The app offers three plans which are Basic, Advanced, and Pro. Each one of the plans is created based on what the business will need. It is not free to use. Each plan has its own pricing according to the needs. Truckstop go is available on both iOS and Android platforms, making it a valuable tool for truckers to manage their loads and stay connected to the industry and enjoy many more features.
